

Sabun Mutfagi has been operating as a wholesale company producing high quality natural handmade soaps since 2011. Our handmade soaps are made to offer the best skin care using only trusted and truly natural ingredients. We never use harmful synthetic chemicals, preservatives, artificial dyes or synthetic fragrances. All our soaps are prepared in small molds and this guarantees the quality of every mold of soaps.

Our % 100 natural olive oil soaps are handmade and made of edible ingredients. We produce our soaps by cold process method which keeps glycerin and nutritive values of aromatrepeutic oils inside soaps. Soaps are poured into wooden molds and they are left to rest for 24-48 hours. We mix each mold by hand, cut by hand and pack by hand. We prepare our own package ourselves. Each mold is subjected to a long maintenance period (40 days). So that it is ready for use when it reaches you.

As Sabun Mutfagi, we produce the highest quality products vegan, odorless, with minimal packaging and environmentally friendly. We are proud to offer you our soaps that we set out to produce in the most natural form and we guarantee your satisfaction with our belief in what we do.
